Dual Spread ™

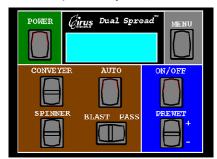

Closed Loop Granular Calibration Guide

NOTE: Make sure the truck is loaded with the material that needs to be calibrated. Make sure the hydraulics are on and warmed up.

Start the truck (turns on power, turn on Menu switch

Default password is 9000
Use the spinner +/- to change the number. Use the pass switch to move to the next number

<u>Setup</u> Enter Password: [0000]

Use the spinner +/- to move the arrow to material.

Setup System Setup Trim/Cal Materials

Use the spinner +/- to move the arrow to Granular .

Use the pass switch to select

<u>Material Setup</u> Granular Prewet

Use the spinner +/- to move the arrow to material you are going to calibrate .

Use the pass switch to select

•		Setup	
I	→1)SALT	4)	
	2)	5)	
	3)	6)	

Use the spinner +/- to move the arrow to Pulses/LB.

(requires auger sensor)

Use the pass switch to select

Granular Material →Pulses/LB: 20.0 Max LB/min: 2000 Use the spinner +/- to move the arrow to weight material dropped.

Use the pass switch to select

Granular Wei9ht Calibration

Calibrate usin9 truck wei9ht → Wei9h material dropped

ct (SPINNER+/-)=select

<PASS>=next

Read the information screen

Use the pass switch to Start

Weight calibration allows SpreadSmart to accurately measure material spread based on sensor inputs. This is done by dispensing a significant amount, and weighing the material dispensed.

Granular Weight Calibration

<BLAST>=cancel

Dispense

Material

<PASS>=start

Use the Auger +/- switch to vary the speed of the Auger. Catch a fairly good amount of material.

Use the pass switch to Stop

Granular - SALT Auger Spinner **45% 0%**

step 1

1) Dispense material for weighing...
WEIGHTCAL

Use the Spinner +/- switch to change the number.

Use the pass switch to move to the next number.

Enter Dispensed Weight | step 2

2) Wei9h dropped material.3) Enter wei9ht below.

Total Dropped Weight: [01610] LB

<BLAST>=prev <SPIN+/->=sel <PASS>=next

You will see a new Calibration of X.X pulses/lb.

Use the pass switch to accept or the blast to start over.

Accept New Calibration?

New calibration: 7.1 pulses/lb

<BLAST>=cance1

(PASS)=accept

The arrow will be back at the Pulses/lb.

Use the Blast switch to accept the calibration

Granular Material page 2/2
Small Increment: 20 LBS/MILE
Large Increment: 100 LBS/MILE
Pulses/LB: 7.1
Maximum LB/min: 1974

<SPIN+/->=sel <ICE+/->=adj <BLAST>=done

Saving configuration will be displayed on the screen. The calibration is finished
