**To add or change one of your granular materials,** power the unit up. Once the "mode" screen is displayed, touch the yellow system button. Using the spinner controls to change the digits, and the blast/pass controls to change cursor positions. Run the cursor past the end to enter setup mode. Using the spinner switch, select "Materials."

Screen shown is the Automatic mode screen with all 4 control channels enabled (auger, spinner. Pre-wet and Anti-Ice)
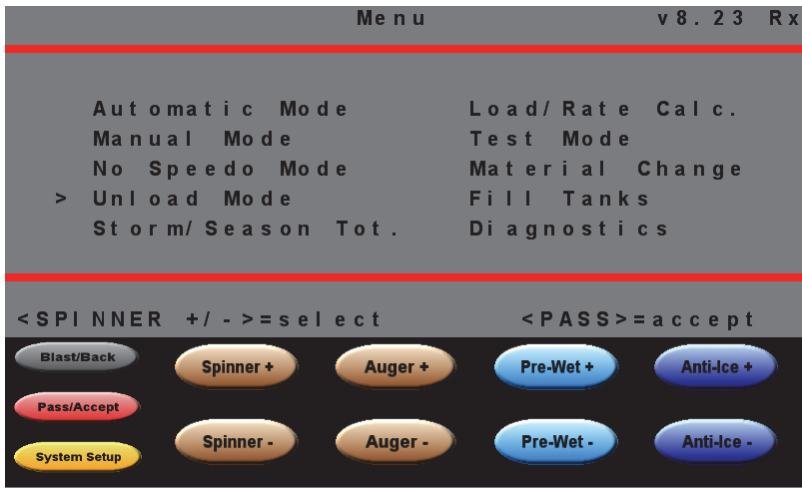

11/18/11
D 11:00 am

Touch function box (auger, spinner, etc) to make adjustments to rate settings.

Touch "Date/Time" for Day / Nite display mode

SpreadSmart Rx touch Screen commands mirror the commands that are found with a keypad operated system.

**Start the truck (turns on power) to reach the Menu screen**

Menu	v8.23 Rx

```
Automatic  Mode        Load/Rate  Calc.
Manual   Mode          Test   Mode
No  Speedo  Mode        Material   Change
>  Unload  Mode          Fill   Tanks
Storm/Season  Tot.       Diagnostics
```

`<SPINNER +/->=select          <PASS>=accept`

Blast/Back	Spinner +	Auger +	Pre-Wet +	Anti-Ice +
Pass/Accept				
System Setup	Spinner -	Auger -	Pre-Wet -	Anti-Ice -

Use the spinner +/- to move the arrow to the mode you choose.

**Use the "pass" button to select the option that the arrow points to.
Use the "blast" button to back up to the last menu.**

Follow the instructions under the red line to indicate which buttons to use to navigate each menu.

To access Unload operating screen, select Unload and use the controls on that screen to unload the truck while standing still.
